VOL XXXIII NO 25

WAUSEON, OHIO, FRIDAY, SEPTEMBER 29, 1916

\$1.50 PER YEAR

## Princess Theatre

### Friday Evening 29 SEPTEMBER

Prices: 35c, 50c and 75c

## BURNING BABIES WITH GASOLINE

Gasoline Should Not Be Used Inside the House as a Washing Fluid Because of its Great Destructiveness to Property and Life—It Roasts Them Alive.

By Bert B. Buckley, State Fire Marshal.

By using gasoline for cleaning fabrics Americans fire more than 20 houses every day of the year.

Still worse, the careless handling of gasoline burns to death more than 20 persons each week in the United States, and dangerously burns three times that many, leaving permanent and ugly scars.

In proportion to the number of buildings set afire, the property loss is small—about four millions dollars a year. The reason for the loss being proportionately small is, in most cases, the screams of a badly blistered woman bring the neighbors and they bring the fire department to the scene at once. Burns from it have disfigured or destroyed thousands of children and mothers.

Gasoline, the liquid, cannot explode. If set afire it burns quietly. It continually gives off an invisible vapor which makes the air with which it is mixed a high explosive—six times as dangerous as powder, but it is sold at once. Burns from it have disfigured or destroyed thousands of children and mothers.

It is a Ghost  
The vapor of gasoline does not rise as other vapors do, to be wafted away, but being slightly heavier than air it sinks to the floor, spreads, and will be drawn up to any blaze of any stove or gas jet by the current of air created by the stove or light.

Gunpowder is inert till a spark or flame is taken to it, but this ghost of gasoline hunts a blaze to explode it. Gasoline if warmed will burst the can containing it while gunpowder will not.

Gasoline gives off this vapor all the time. If the air in a room is one-fifth gasoline vapor, it will explode with greater force if it were a roomful of powder.

The use of gasoline for wash-water should be limited to the so-called "dry" cleaning establishments, in which its handling is regulated by law. Laws to enforce the use of it in the home would require a multitude of policemen.

Invitation to Horrible Death.  
An urgent invitation to a horrible death is the washing of goods in a pan of gasoline in a room in which there is a fire.

Goods washed in gasoline should not be taken to dry into a room in which there is a blaze of any kind. In Columbus a barber carried a fresh-washed wig into a room heated by a stove and put it in a bureau drawer. In a little while he saw a flash from the stove to the bureau 14 feet away and found the wig afire.

In Ohio in one year five women were burned to death for adding gasoline to clothes in a wash-boiler while it was on the stove—an act almost invariably disastrous.

Take it Outside  
For washing, gasoline should not be used within the house and then smokers should be kept away for the glowing tobacco in cigarette, cigar or pipe will explode the vapor.

A spark which will explode the vapor may be produced by rubbing silks in gasoline; this is true of the thinnest of silk gloves.

Many serious accidents are from gasoline being mistaken for kerosene, either by the user taking the wrong can or by a dealer filling a can from a wrong tank, and occasionally accidents occur from gasoline being mistaken for water. A mother brought gasoline from the store in a bucket and her daughter filled the coffee pot with it and was burned to death by its explosion.

To dispose of gasoline after use by pouring it into a sink or slop bucket or in a house sewer is to invite calamity, for it floats on water and continually gives off its vapor. When dirty it should be thrown upon ground which will absorb it while the four winds dissipate its gas.

Why Not Play Safe?  
Clothing can be chemically cleaned by ammonia or benzene soap without danger. A safe substitute is kerosene benzene in which 25 per cent. benzene is added to a mass of soap, water

and ammonia. It can be handled without spilling; the amount of vapor given off is slight and the amount of inflammable material in it is small. Gasoline fires may be extinguished by smothering with wet rags, woolen cloth, sand, earth or ashes, if the amount of the fluid involved is small. If the amount be large, a little water should be cooled with water to lessen the amount of vapor given off.

## REVENUE STAMP

ACT REPEALED

The Act of October 22, 1914, providing for adhesive stamps, has been repealed, effective after midnight September 8, 1916. It will, therefore, not be necessary to stamp any documents issued executed after that time. This will apply to bonds, mortgages, certificates of indebtedness, certificates of stock transfers of stock certificates, agreements of sale, promissory notes, express receipts and bills of lading, telegraph transfers, messages, indemnity or other bonds, certificates, brokers' contracts, conveyances, deeds, insurance policies, passage tickets, powers of attorney and protests.

It will also not be necessary to stamp perfumery, cosmetics or similar products, toilet soaps, chewing gum, etc.

In short on and after September 9, 1916, it will not be necessary to affix documentary or proprietary stamps to any paper or article issued or shipped on and after the above date.

Documents etc. issued and delivered prior to midnight September 8, 1916, must be stamped.

Persons having in their possession any documentary or proprietary stamps may make application to the undersigned for refund upon which will be made claim for redemption of unused stamps.

It should be noted that the stamp tax on wines, cordials and compounds has not been repealed.

Respectfully,  
FRANK B. NILES, Collector.

## THE SULKERS

The world's too busy to pause To listen to a whiner's cause. It has no time to stop and pet The sulkers in a peevish fret Who wait he'll neither work nor play.

Because things haven't gone his way. The world keeps plodding right along And never stops to hear him wail. To all who have the grit to work Regardless of the fool or shirk The world says this to every man: "Go out and do the best you can."

The world's too busy to improve With any one to try once more, "I'll beat him if he wants to rise, And boost him if he bravely tries, And shows determination grim, But it won't stop to baby him."

The world is occupied with men Who fall but quickly rise again; But those who whine because they're And step aside to sulk a bit Are doomed some day to wake and find The world has left them far behind.

## HOSPITAL NEARS COMPLETION.

According to present estimates, the new Homeopathic Hospital at The Ohio State University will be completed by August 15, although it is possible that the work may be delayed two or three weeks. To defray the cost of the building \$15,000 was given to the University by the trustees of the Cleveland Pulte Medical College and \$15,000 by the trustees of the Pulte Medical College of Cincinnati and the balance by The Ohio State University.

"There will be 52 beds, as well as X-ray and clinical laboratories. The hospital is fully equipped for clinical teaching purposes, with operating, eye, ear, nose and throat rooms, clinical lecture-rooms and laboratories for clinical diagnosis and X-ray," said Dr. Claude A. Burgett, dean of the College of Homeopathic Medicine.

## Stop The First Cold.

A cold does not get well of itself. The process of wearing out a cold wears you out, and your cough becomes serious if neglected. Hacking coughs drain the energy and sap the vitality. For 47 years the happy combination of soothing antiseptic balms in Dr. King's New Discovery has healed coughs and relieved congestion. Young and old can testify to the effectiveness of Dr. King's New Discovery for coughs and colds. Buy a bottle to-day at your druggist, 50c.

## COUNTY AFFAIRS

### Cases in Probate Court—Marriage

Licenses—Real Estate Transfers—Orders Drawn on Treasury—New Cases in Common Pleas Court.

### New Cases in Common Pleas Court.

Ella Kaufman vs. Christ Kaufman, action for divorce.  
Lyons Grain and Coal Co., vs. Raymond J. Henshaw, action to collect money.

New York Central Rail Road Company vs. Fulton County Commissioners, et al, appeal from ruling and order of County Commissioners. Hearing September 28, 1916.

Estate of Amy Geyser, application filed. Bond filed. Letters of administration with the will annexed issued to

## THE VALUE OF HEALTH.

What profiteth a man that he gain the whole world yet lose his health? Naturalists say that long ago the prehistoric waters were infested with a species of enormous shark which finally became extinct by means of the workings of its voracious appetite. Thus! Nature eliminates the over-fed.

The desire for ease of life and plentiful diet is universal and is the great stimulus of man and animals alike. When man becomes greedy and takes more ease and food and drink than his share, Nature discards him.

In the race for power and place for ease of circumstance and relief from the stimulus of hunger, the modern man is apt to forget that unless he is careful of his body he will soon be made to suffer for the infraction of Nature's inexorable physical law. With the loss in body tone comes an equal loss in mental acuity and the brain which or a time was able to operate despite the complaints of an over-fed, under-exercised, self-poisoned body, stops working.

Statisticians have discovered that the mortality rate of persons in the United States over 45 years of age is increasing. The strenuous life of today is not alone responsible for this. Lack of health-giving exercise, superfluity of diet, lack of restoring sleep, over-stimulation, the high pressure of the race for power, wealth and position, plus physical neglect, these bring early decay. The goal is reached, wealth is amassed, honor, position and power are just being grasped when

the apple of accomplishment turns to the ashes of dissolution. The brilliant mind becomes clouded, the steady hand is no longer accurate, the eye which once gazed fearlessly on the whole world is dimmed and it is not long before the final break up occurs. All of this was entirely preventable.

Other things being equal it is the man who leads the well-balanced life who lasts the longest, whose work to the end is uniformly the best, he who neither over-works nor over-plays, neither over-eats, over-drinks, nor over-sleeps, he who maintains a standard of simple healthy diet in moderation, who offsets mental work with physical recreation, who is as honest with his own body as he is with his own business. When success comes to such a one his physical and mental condition is such that he can enjoy in peace of mind and contentment of body the fruits of his labors.

The regulations of U. S. Public Health Service state: "It is the duty of officers to maintain their physical as well as their professional fitness. To this end they shall be allowed time for recreation and study whenever their official duties will permit." If the Government regards it as essential that its sanitary experts shall be safeguarded in this way, is it not equally important to every citizen that he similarly maintain a high standard of physical integrity?

All our Holland bulbs are here now. Order your tulips, hyacinths, daffodils, crocus, etc.

25-6 C WAUSEON FLORAL CO.

## STATE ECONOMY AND EFFICIENCY

Carrying out the plan of the administration of Governor Willis to effect efficiency and economy in all departments, the State Civil Service Commission and State Industrial Commission have heard the report of the firm of Ernst & Ernst, Cleveland accountants, who, after a survey of the Industrial Commission, which was established by Governor Cox, recommended an annual saving of \$39,000.

This will be accomplished by various economies and consolidation of certain branches of work which were created by the preceding administration in order to make places for friends of Cox, many of whom are still on the State payroll, due to the blanket Civil Service program of the former governor. Additional surveys are in progress, all under direction of Governor Willis.

Forget Your Aches.  
Stiff knees, aching limbs, lame back make life a burden. If you suffer from rheumatism, gout, lumbago, neuralgia, get a bottle of Sloan's Liniment, the universal remedy for pain. Easy to apply; it penetrates without rubbing and soothes the tender flesh. Cleaner and more effective than musky ointments or poultices. For strains or sprains, sore muscles or wrenched ligaments resulting from strenuous exercise, Sloan's Liniment gives quick relief. Keep it on hand for emergencies. At your druggist, 25c.

## HIGH SCHOOL LECTURE COURSE

The sale of season tickets for the lecture course given by the Seniors of the W. H. S. has begun. The tickets may be obtained from any Senior at the usual price \$1.25 for adults and 75 cents for pupils.

The first number will be The Schumann Quintet, Friday October 13, 1916. This company renders classical programs, bringing to the Lyceum a new idea, that of presenting symphonic concerts with a company of only five members. Mr. Lampert, the organizer, in his historic introduction and interpretation has a message for the masses and the Schumann programs are as educational as they are entertaining.

The second number of the course on Monday November 13, 1916, will be a solid lecture by Chancellor Geo. H. Bradford. He is a man of big ideas, big purposes, strong character, capable of working out great problems in a way suited to somewhat unusual conditions. This great scholar, promulgator, of a stronger social education knows how we can get the most out of the present condition of affairs, how to apply the things the schools offer to the best advantage. Questions which demand the attention of every right thinking man and woman.

After the holiday season is over Fredrick E. Hopkins will bring to us, Wednesday January 24, 1917, a divine message, The Golden Fleece. He is a brilliant, magnetic, charming speaker, an orator, entertainer, and an educator.

His lecture will be full of optimism and hopefulness. The audience will be delighted. Then on Wednesday February 21, 1917, The Beulah Buck Quartet company will be with us to give us an evening of entertainment. They possess well trained talent on the part of every member of the company. Their work will both please and amuse you. These four ladies will sing some remarkably fine songs and Mrs. Buck will give some splendid readings. Come and enjoy it.

The Lecture Course of 16-17 will close with a reading by Gay Zenola MacLaren. She has an almost vortical power of changing her voice to portray a seemingly unlimited number of characters, and it is due to this rare and remarkable gift that she is able to present entire plays successfully. She possesses unique genius. It will be a delight for you to see and hear her.

The Senior Class is bringing to you the best talent on the Lyceum platform. It will benefit you not only individually but as a community.

## CHANDLER SIX

\$1295  
(F. O. B. CLEVELAND)

## Answering the Question Thousands Have Asked

THE automobile industry is so big, so vital, that rumors run rife in it, rumors founded and unfounded. So it is not strange that thousands of admirers of the Chandler Six, thousands of prospective Chandler owners, have asked "What are you going to do in January? Are you going to bring out a new model? Are you going to build such-and-such kind of motor? Is it true you are going to adopt a new design of body? What about the price?"

And this is our answer.

In the series of Chandler Sixes which will follow our completion of production of the present series,

we shall continue to build as the heart of this great car the same Marvelous Motor which, with some minor refinements from time to time, has distinguished the Chandler for four years past, the same Chandler-design and Chandler-build motor which has become famous for its power and flexibility and simplicity and economy. And

we shall continue the beautiful walnut-panelled tonneau-cowl type of bodies—with soft, deep cushions and lustrous finish—which preceded many recent "new models" by many months. And

the price cannot be lowered. In all probability it will be higher.

Ask any Chandler dealer or any owner of any Chandler—whether Type 14 or 15 or 16 or 17—if he would have us build some other type of motor.

Ask yourself what change could make the present Chandler more beautiful in body design.

This is our answer to the thousands who have asked. THE CHANDLER YOU MAY BUY THIS WEEK WILL BE JUST AS UP-TO-DATE NEXT SPRING AS THE CHANDLERS WE SHALL BE BUILDING THEN.

CHANDLER MOTOR CAR COMPANY, CLEVELAND, OHIO
